

Aveda Smooth Infusion™ Retexturizing

GET THE HAIR YOU LOVE. PERMANENTLY.

Transformation, Re-creation, Defying convention. This essence of Aveda's new Smooth Infusion Retexturizing System – a versatile thermal straightening system that permanently softens, smoothes or completely straightens hair. With the highest percentage of naturally derived ingredients and botanical essences, it leaves your hair amazingly soft, shiny and smooth. This is the hair of your dreams.

Choose the style you want with our Aveda Smooth infusion™ retexturizing treatment. It is a professional salon treatment that permanently softens texture, smoothes or straightens hair, turning waves and curls into sleek, controlled looks, and delivering customized texture effects unique to you. Go permanently stick-straight or soften curls and control frizz. Organic jojoba oil, meadowfoam seed oil and coconut-derived ingredients condition hair while organic ylang ylang soothes the senses. The treatment leaves your hair smooth, shiny and easier to style.

You can retexturize colour-treated, highlighted and chemically-processed hair (but not hair that has been previously treated with a sodium hydroxide relaxer).

What you can expect:

- A customized consultation and smooth infusion™ retexturizing treatment that gives your hair the texture you want.
- Service time of approximately 3 to 4 hours depending on your hair length, how curly it is etc
- Permanently smooth and shiny hair that makes daily styling easier.
- To make the most of your smooth new look, we recommend following your retexturizing service with a haircut.
- Avoid getting hair wet, wearing ponytails, clips or headbands or tucking hair behind your ears for 72 hours after treatment.

Here is a recent client of Kamigata showing the results of the Aveda Smooth Infusion Retexturising Treatment, the before and the after!
